

HOW DOES 360 WHITENING WORK?

The dual action of **360 Whitening** gel lightens your teeth from within whilst simultaneously removing surface stains. The unique gel breaks down to form oxygen ions that safely penetrate deep into your teeth giving a brighter, whiter smile.

HOW DO I GET MY TEETH WHITENED?

Your dentist will take impressions of your teeth, send these to our laboratory where we create soft, flexible bespoke trays.

HOW DO I USE THE SYSTEM?

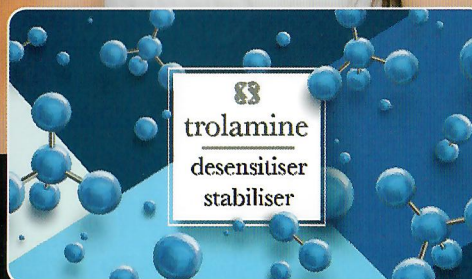

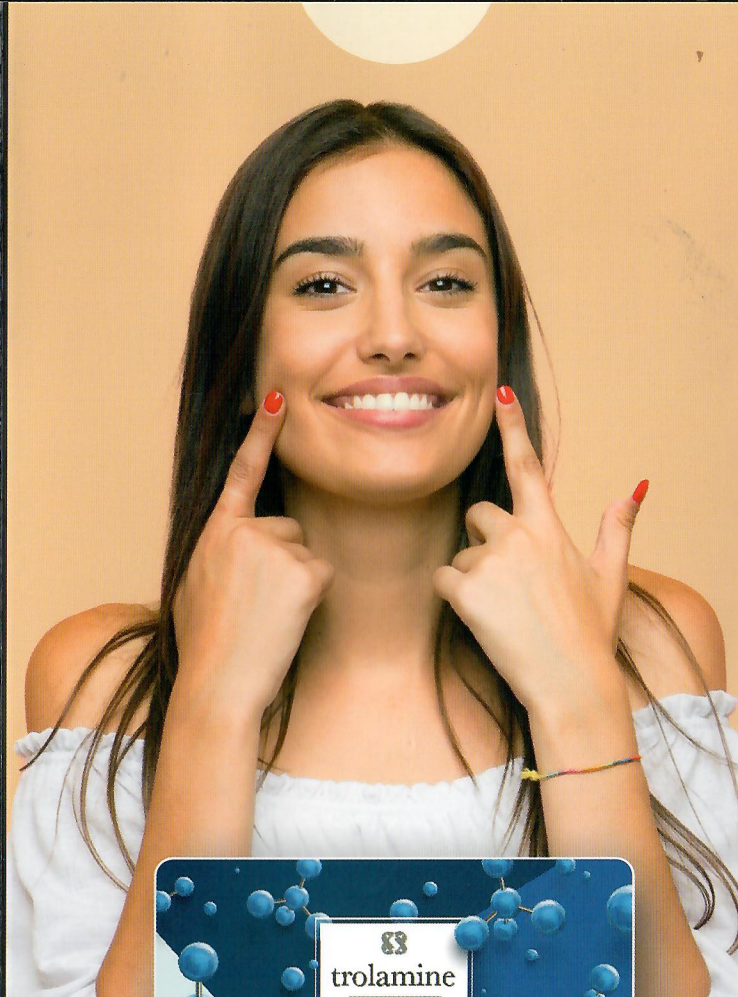

- You have two choices, you can use our day formula for an hour a day, or we have an overnight formulation which will go to work while you sleep.
- You will fill your trays with just a small quantity of our gel, the dual action **360 Whitening** gel lightens your teeth from within while simultaneously removing surface stains.
- The unique gel breaks down to form oxygen ions that safely penetrate deep into your teeth giving a brighter, whiter smile.

HOW LONG WILL IT TAKE?

Most people will start to see a difference within days.

TROLAMINE STABILISES & DESENSITISES

360 Whitening uses our new trolamine formulation to create a gel that gently whitens your teeth with long lasting results and low sensitivity.

Only registered dental professionals are legally allowed to carry out tooth whitening. This ensures your tooth whitening journey is safe, effective and comfortable. Treatments offered by non dental professionals (such as tanning and beauty salons) could be dangerous and cause permanent damage to your gums and teeth.

- We use the highest percentage of professional peroxide with **Trolamine** available for an effective whitening action.
- **360 whitening** gels are proven to be safe, effective and produce visible results in less than a week.
- **360 whitening** is a patented formula that has been formulated to be fast acting with less overall sensitivity.
